Method of charging grout into borehole - grout and plug being  
inserted into charging cylinder and plug being displaced thereby  
pushing grout from charging cylinder into borehole

RHAM EQUIP PTY LTD 92.08.12 92ZA-006065

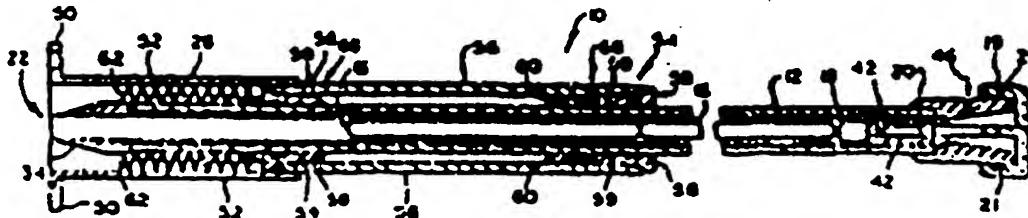

(94.08.31) E21C, E21D

93.11.03 93ZA-008215

Grout is charged into a borehole together with a plug, the plug  
engaging the wall of the borehole, at its entrance, to retain the grout  
in the borehole. The grout and plug are charged into the borehole by  
an apparatus having a charging cylinder which is moved into and out  
of engagement with the mouth of the borehole.

The grout and plug are inserted into the charging cylinder and the  
plug is displaced thereby pushing the grout from the charging  
cylinder into the borehole, with the plug also being displaced into the  
borehole. The plug has anchor formations to anchor it in the  
borehole. (25pp Dwg. No. 1/1)
